

# THE FACE OF CONFLICT IN AFRICA

What do the conflict patterns look like across Africa in the context of Time and Types Of Conflict ?

Conflict Frequency Distribution 1997

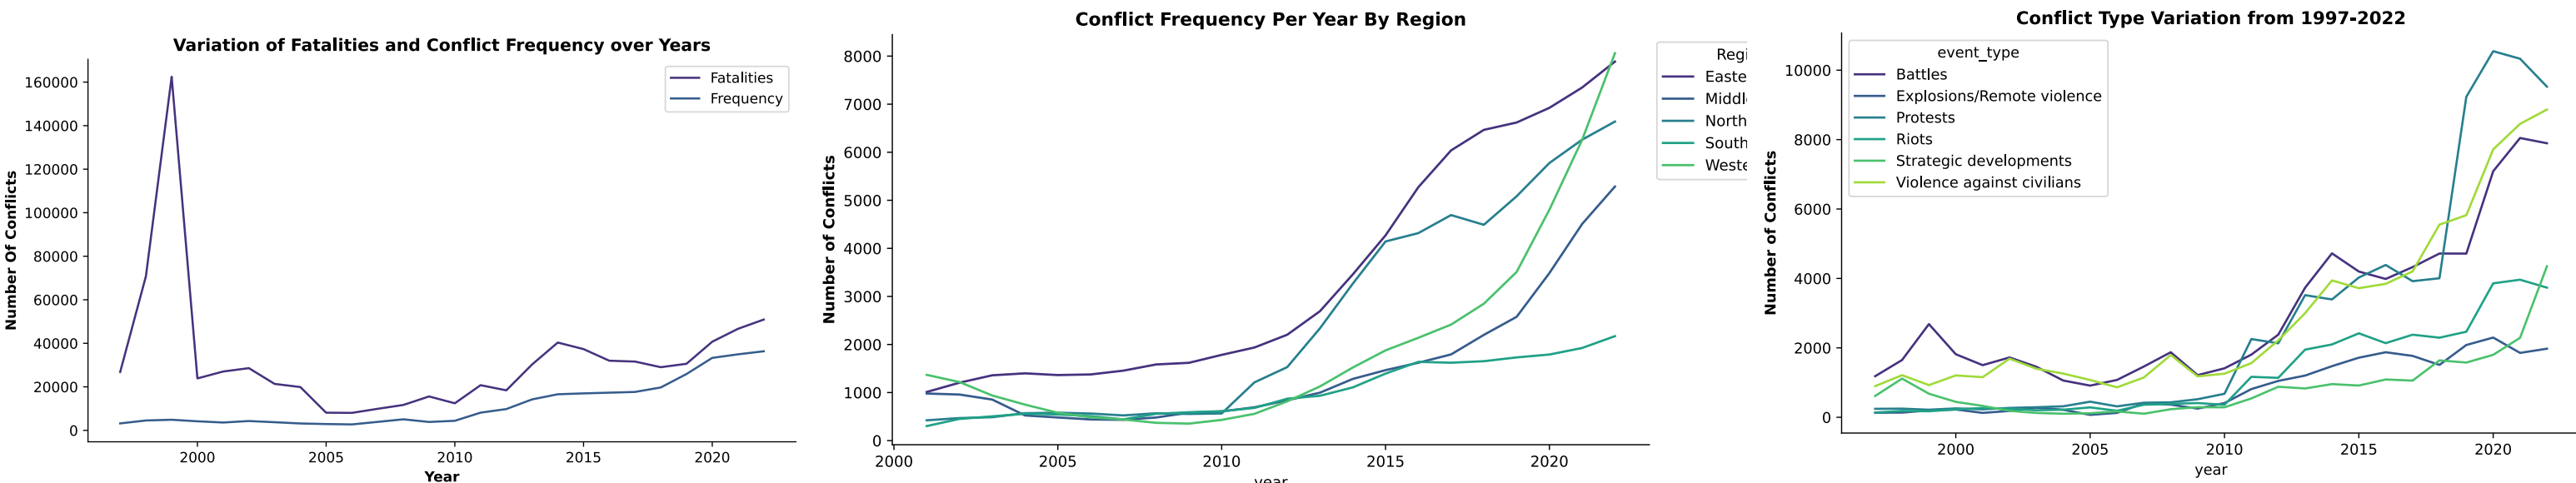

Conflict Frequency Distribution 2022

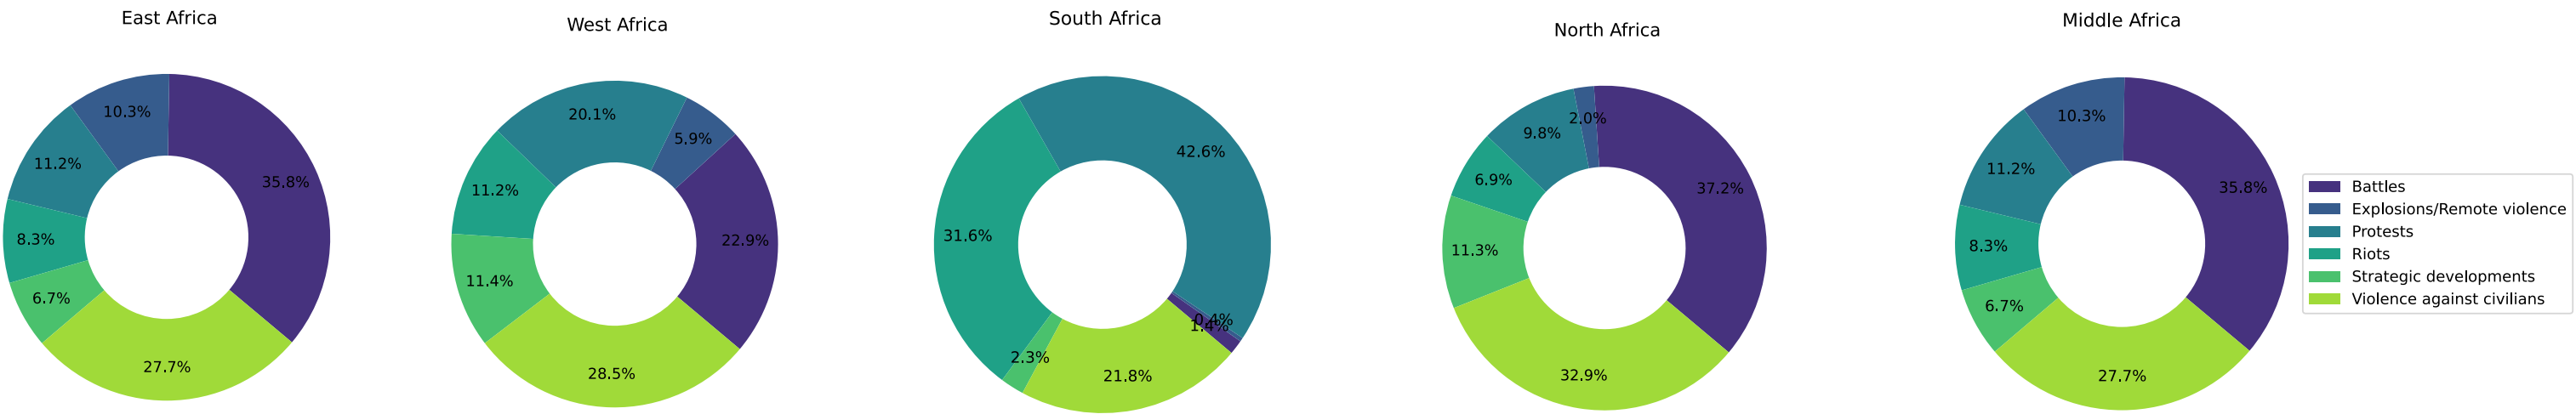

The number of conflicts in Africa has increased significantly and conflict has become more widespread since 1997 with 54% of all conflicts happening in Eastern and Northern Africa

## Temporal Patterns

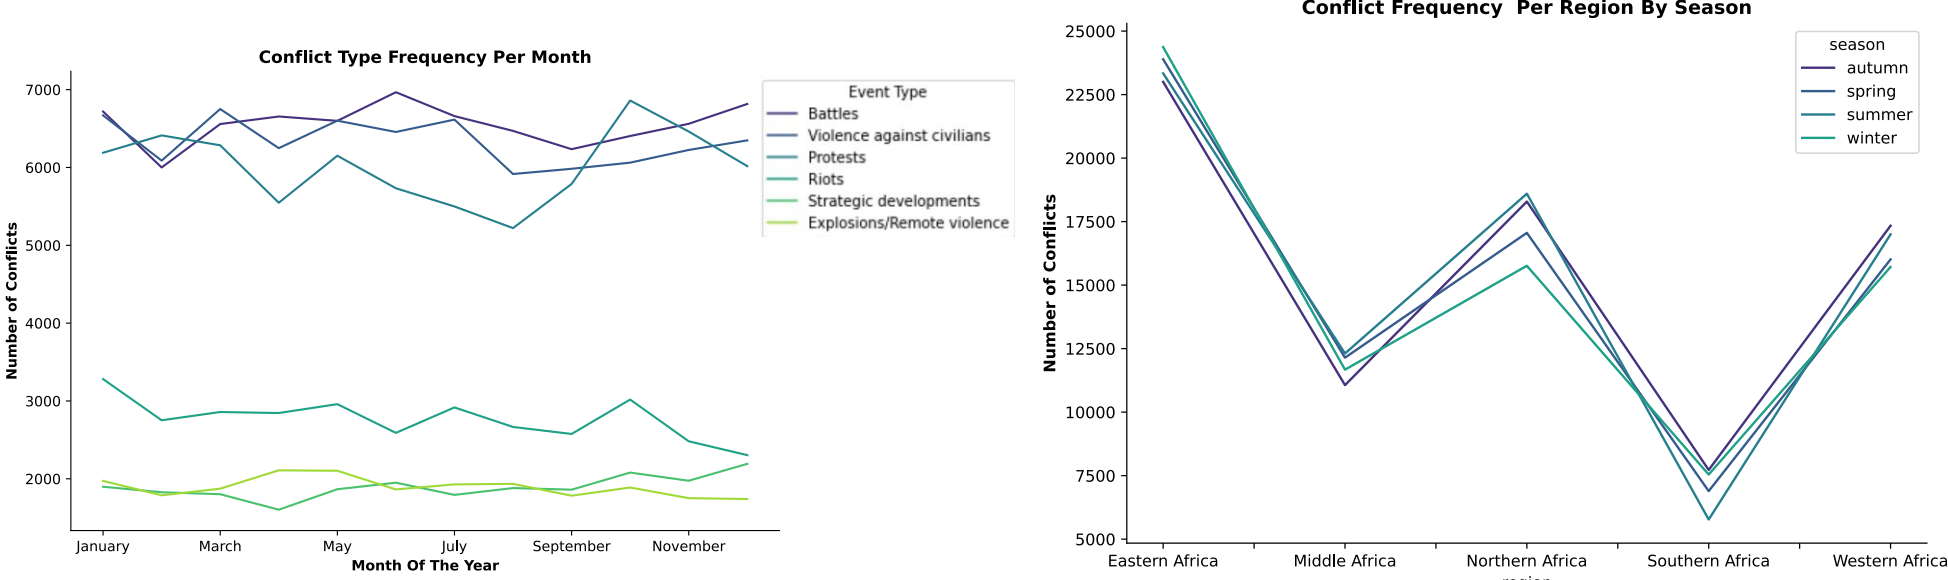

Conflict incidence continues to rise, the greatest spike happening since 2012. Protests and violence against citizens have become the most common type of conflict with projections of an even steeper rise in the future

## Conflict Type Distribution Across Africa

## Seasonal Variation Of Conflicts

Conflict frequency vary by season (95% confidence) with Spring having the most number of conflicts. Unlike most regions which have the lowest number of conflicts in winter months, Eastern Africa exhibits an unusually high conflict incidence during this time

## Most Affected Country
